The children at our nursery have been participating in Jo Jingle sessions since September 2000- with great success! Each week has got better and better, the children seem to know when the door bell rings on a Thursday morning, that Sally has arrived with her puppet Jo!

The benefits are evident, it improves the children's confidence and independence. The musical movement sessions enhance their development skills such as:- physical, language and manipulative. Each week the sessions are linked to the nursery theme or topic which incorporates a educational slant.

Taking part and having fun is what its all about, the children interact with their peer group and adults. Their concentration is improving and the new songs they have learnt, they sing at nursery and at home.

Jo Jingles outside of the nursery has also taken off, with children's birthday parties. Our older children (3-4 year olds) are learning about musical notes and are having a little bit of homework each week, so parents can feel involved.

All the staff, parents and especially the children are glad we started the sessions, we recommend it to everyone.
